July 8, 2016

Dear Snowden Lane Neighborhood Residents:

A neighborhood meeting will be held on Wednesday, July 20, 2016 to discuss the New Jersey American Water Company (NJAW) installation of a new water main on Snowden Lane from the northern side of the Franklin Avenue intersection to the northern side of the Overbrook Drive intersection. Representatives of NJAW, CRJ Contracting (NJAW's contractor) and the Princeton Engineering Department will be in attendance.

The meeting has been scheduled for 7:00 PM in the Main Meeting Room of the Municipal Building located at 400 Witherspoon Street. All interested residents are invited to attend. The pipeline work is planned to start the week of August 1st and be completed within six weeks, weather permitting. Mr. John Thomas, NJAW inspector, will be on site while the work is proceeding and can be contacted at (908) 380-7367. The milling and resurfacing of the roadway within the project limits will take place later in the autumn. Additional notice will be provided prior to start of the milling and paving work.

Included in the work is the installation of an 8" water main; new water services and to each home within the project limits; new meter pits behind sidewalk / curb; and new tie-ins to the existing water mains on Braeburn Drive, Leabrook Lane and Maybury Hill Road. NJAW will notify you in advance if water service to your home will need to be shut off for a short (1-2 hours) period of time during construction.

Residents are advised that the Municipality will be imposing a 5-year moratorium on any street openings on this section of Snowden Lane once the work is completed. Therefore, if you plan to upgrade or install new utility services such as gas, water, electric, etc., please contact the respective utility company at this time to make the necessary arrangements. A telephone list for the various project contacts is provided on the back of this notice for your use.

I invite you to attend this meeting to meet the NJAW representatives and their contractor, and to discuss any concerns you may have regarding this project.

Sincerely,

Deanna Stockton, P.E.
Municipal Engineer
